MULTIPLIER (EHFF):

AHB WATER PIPE HEAT CABLE

- The AHB automatic electric water pipe heating cable is a preassembled and ready-to-install, cable that prevents metal and plastic supply pipes from freezing
- AHB units are activated and de-activated by an integral energy saving thermostat
- Suitable for commercial and residential metal or plastic water supply pipes subject to freezing temperatures
- Keeps water flowing at ambient temperatures down to -40°F (-40°C)
- Cables are rated at 7 Watts per foot (0.30 m)
- Built-in thermostat turns on at +38°F (+3°C) or below and turns off at +45°F (+7°C) and above
- Plugs into a standard 120 Vac outlet, must be GFCI protected

MULTIPLIER (EHFF):

FREEZE-FREE SELF REGULATING CABLE

- Freeze Free™ self-regulating pipe heating cables provide flexible protection against pipe freeze-ups
- Cut-to-length capability on the job is ideal for installations that require protection of numerous pipes of varied lengths
- The self-regulating effect of the cable reduces power consumption when the pipe does not require freeze protection
- Residential metal or plastic water supply and drain pipes subject to freezing temperatures
- Water supply lines underneath mobile and manufactured homes
- Cottages, barns and outbuildings that are not regularly heated
- 120 Vac operating voltage
- Keeps plastic and metal water pipes from freezing down to -60°F (-51°C)

SR TRACE SELF-REGULATING CABLE

- Self-regulating heating cable that provides maximum freeze protection and maintains temperatures for supply and drain pipes and vessels
- Automatically varies its heat output as the surrounding Temperature changes
- Commercial metal or plastic water supply and drain pipes subject to freezing
- Liquids piped during processing that require constant temperatures
- Freeze protection for main and branch sprinkler systems
- Suitable for refrigeration/HVAC condensation lines that are subject to freezing temperatures
- Maximum freeze protection for pipes and vessels in ambient temperatures down to -40°F (-40°C)
- Freeze protection for metal or plastic pipes up to 8 in

SR TRACE ACCESSORIES

- Use with SR Trace Self-Regulating Cable
- Provides heat shrinkable end seals
- Provides heat shrink tubing based power connection for one or two cables within customer supplied junction box.
- Can be used for heating cable to heating cable splice using a customer supplied junction box

EASY HEAT THERMOSTATICALLY CONTROLLED DEVICE

- Power Indicator Light • 125 Volts, 15 Amps • For Dry Location Only
- Turns ON at 38° F / 3° C and OFF at 50° F / 10° C
- Eliminates the need for unplugging heating cables each spring, and reduces the risk of frozen pipes.
- Controls other electrical devices that need to be activated when the temperature approaches the freezing point
